

# List of Tables

Table 4.1:	Thermophysical data.....	59
Table 4.2:	Computer interface information for DVD system components.....	85
Table 6.1:	DVD deposition of silicon .....	125
Table 7.1:	Deposition efficiency of copper onto flat substrate .....	134
Table 7.2:	Deposition efficiency of copper as a function of e-beam power .....	144
Table 7.3:	Deposition efficiency of copper onto flat substrate .....	149
Table 7.4:	Deposition efficiency of copper onto stationary fibers.....	154
Table 7.5:	Variation of clustering probability with process conditions .....	161
Table 8.1:	Knudsen numbers for extreme experimental conditions .....	169
Table 8.2:	User-configurable DSMC model parameters .....	176
Table 8.3:	Required inputs for bimolecular collision theory model .....	179
Table 9.1:	Copper atom energy 2.5 cm from target .....	209
Table 9.2:	Copper atom energy 5.0 cm from target .....	209
Table 10.1:	Number of grid points used for each chamber pressure .....	213
Table 10.2:	DVD process simulation results .....	225
Table 11.1:	Enhanced DVD deposition characteristics .....	241
Table E.1:	Deposited vapor thickness versus location .....	349
